

HOW TO STUDY FOR A TEST

1. Don't wait until the last minute to study.
2. Go over all vocabulary words that appear in dark print. Know the meanings.
3. Skim the chapter or section titles for main ideas.
4. Answer all the questions that are at the end of each part. If you are unsure of the answers, go back and reread the section.
5. Check the end of the chapter for the main ideas that were presented. Do review questions.
6. Close the book and repeat orally as many facts as you can remember, or have an adult quiz you about the chapter.
7. Read all the captions under the pictures and photographs.
8. The morning of the test, open to the first page of the chapter and skim over it.
9. Don't panic when the test is passed. Answer the questions you are sure of first. Then go back and think out the others.
